△ ALTAIR

Altair Units Licensing System (AULS)

Product Brief

The Altair licensing model is defined by an "all in and always on" philosophy. Users get full access to our software tools whenever they need them, and they can determine when, where, and how they want to use different tools without needing to worry if they're eligible for access. Altair units give users the **flexibility** to run software anywhere, the **freedom** to choose what software tools they need when they need them, and unparalleled **value** that maximizes use and minimizes cost.

Altair Differentiators

+ A patented model, therefore, by definition unique to Altair. (https://altair.com/altair-units)
+ Units are "non-perishable" meaning after use, they go back into the pool for re-use
+ Access to over 150 software products via products suites that align to product development personas.
+ Flexible and easy to manage minimizing, purchasing, finance and IT support.
+ Scaleable, preserves tool access regardless of down or upsizing based on project needs.
+ Leverages leveling (instead of stacking) when using multiple tools at the same time which maximizes the remaining pool for enterprise use.
+ Accessible based on global zones (Americas, European, and Asia Pacific)

DoD/Federal/Industry Customers Include

+ Army, Navy, Air Force and Marines
+ Defense Prime Contractors
+ National Labs
+ Government Department and Offices
+ Universities
+ Local Governments

DoD Problems Solved

+ Access to all tools all the time.
+ Enables real M&S team growth to be scalable without the need to go back to purchasing/finance teams to purchase/re-purchase software as team size fluctuates.
+ Effectively distribute current spending across groups in the most fiscally responsible manner
+ Single license file serving individual global zones.
