SIMPLIFY COMPLEX DATA, ACCELERATE PUBLIC SERVICE

Today's state and local agencies are overwhelmed by data from disparate systems—legacy platforms, PDFs, spreadsheets, ERP systems, and more. Manual data preparation wastes valuable time and increases the risk of errors, delays, and compliance issues. Altair® Monarch® and Altair® Monarch Server™ empower public sector employees to quickly access, transform, and automate critical data workflows—without needing programming skills or IT intervention.

Why Monarch for Government?

- **Connect to Any Data Source:** Extract from PDFs, text reports, mainframes, spreadsheets, SQL databases, cloud applications, and more.
- **No-Code Data Preparation:** Easily clean, join, and transform data using an intuitive drag-and-drop interface. Create reusable models that save time and reduce manual effort.
- **Automate Workflows and Reports:** Schedule recurring data extractions and deliver results to key stakeholders with Monarch Server. Gain efficiency while ensuring data accuracy and transparency.
- **Improve Audit Readiness:** Build consistent, repeatable processes that support compliance, audit trails, and documentation—especially critical for grants, procurement, and financial reporting.
- **Data Cleansing for AI Readiness:** Monarch cleans, deduplicates, standardizes, and structures data to ensure high-quality inputs for AI models, improving accuracy and context-awareness.

Common Use Cases in State and Local Government

- **Financial and Budget Reporting:** Automate the collection, formatting, and reconciliation of budget data across departments.
- **Public Safety and Justice Reporting:** Convert case files, incident logs, or PDF reports into structured datasets for analysis and dashboards.
- **Grant Management:** Streamline compliance tracking and reporting with automated extraction from federal grant documents.
- **Procurement and Vendor Oversight:** Reconcile vendor invoices and payments across systems without manual data entry.

- **Performance Dashboards:** Feed clean, standardized data into business intelligence (BI) tools like Power BI, Tableau, or Excel for timely reporting.
- **Healthcare Compliance Reporting:** Monarch automates the extraction, cleansing, and reporting of data from EMR/EHR systems and 835 remittance files, ensuring accurate, timely compliance with HIPAA, Medicaid, and Medicare regulations.

Key Benefits
- Reduce Manual Effort by Up to 80%
- Enable Faster Decision-Making
- Boost Productivity
- Enhance Transparency and Accountability
- Deliver Better Outcomes for Citizens

Why Altair?
With a 40-year legacy of analytics innovation, Altair supports dozens of state and local agencies with trusted, secure, and scalable solutions. Monarch is battle-tested in public finance, transportation, corrections, health and human services, and more.

MONARCH EMPOWERS PUBLIC SECTOR TEAMS TO SWIFTLY ACCESS, TRANSFORM, AND AUTOMATE VITAL DATA WORKFLOWS.
