

BOOSTING INNOVATION IN GOOGLE CLOUD WITH ALTAIR ONE®

Altair One® is a unified platform that leverages Google Cloud's high-performance computing resources for scalable HPC. It provides essential tools, data, and computing power with an intuitive licensing system to accelerate workflows, improve product safety, and enhance efficiency. Here are 10 reasons why Altair One is a top choice for your business:

- 1. Universal accessibility:** Access applications, data, and compute from any location and device with an internet connection.
- 2. Enhanced collaboration:** Multiple users can edit the same document simultaneously, improving teamwork.
- 3. Efficient HPC as a service:** Create and scale HPC clusters on demand without costly infrastructure investment.
- 4. Seamless integration:** Work directly on documents in Altair Drive, streamlining workflows.
- 5. Cost-effective desktop as a service:** Reduce hardware costs and access desktops and applications from any device.
- 6. Improved design cycles:** Speed up workflows with real-time visual collaboration.
- 7. Reduced errors and enhanced innovation:** Identify design issues early for better decision-making and creativity.
- 8. Effortless file sharing:** Easily share files and folders with fine-grained access control to boost team efficiency.
- 9. Robust backup and security:** Securely back up files with advanced protection against data loss.
- 10. Future-proof technology:** Stay updated with the latest software and hardware.

Work from anywhere via web browser in Altair One.

Scale HPC resources with your team.
