

MCALIBRATION TOP USE CASES

Altair Partner Alliance

Quick and Easy Material Model Calibration

Challenge

- Helps engineers find Radioss material model parameters from experimental data

Solution

- Our MCalibration software have built in tools for cleaning up experimental data and for finding the most accurate material parameters for a material model.

Result

- Advanced material models in Radioss can be highly non-linear and difficult to use. Our MCalibration software makes it easy to also use these more advanced material models, including the models in the PolyUMod library.
